

DIVYANSH SHARMA

Full Stack Developer Intern | React.js • Python • Node.js

Noida, Delhi NCR, India | [+91-8077073548](tel:+91-8077073548) | b25bs1093@iitj.ac.in | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Website](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive web applications, REST APIs, authentication flows, interactive dashboards, and MySQL-backed business applications. Strong foundation in React.js component architecture, server-side data fetching, and scalable Python development, providing the exact engineering foundation for rapid onboarding to Next.js and FastAPI. Immediately available for a full-time, on-site internship in Noida.

PROFESSIONAL EXPERIENCE

Database Management Engineer & Python Developer— Shri Ram International School (CBSE) , Sambhal, UP Mar 2026 – Present

- Developed Python-based automation and data-processing workflows for institutional operations, while maintaining MySQL databases supporting 1,000+ students.
- Wrote clean, reusable, and maintainable code to perform complex SQL joins, database relationships, and CRUD operations for student records.
- Collaborated with developers and school administrators to test application features and APIs before deployment.

Junior Data Analyst & Web Development Intern— Wire Fusion Metrics Ltd. , Bangalore (Remote) [LinkedIn](#) Jul 2025 – Jan 2026

- Cleaned, analyzed, and transformed datasets using Python, Pandas, and SQL; built Power BI dashboards that streamlined recurring reporting for the team.
- Improved web application UI/UX and delivered feature integrations, contributing to ongoing site maintenance, debugging, and reliability.
- Collaborated with developers and designers to build responsive and user-friendly web interfaces using Git and GitHub for version control.

Computer Science & AI Teacher— Bal Vidya Mandir Sr. Sec. School (CBSE)

Jun 2024 – Mar 2025

Additional Experience

- Taught Python, SQL, Informatics Practices, and Artificial Intelligence to Classes IX–XII

KEY PROJECTS & RESEARCH

SRI ERP & SRI Accounts — Full-Stack School Management Platforms | [ERP Link](#) | [Accounts Link](#) | [GitHub](#)

React, TypeScript, Supabase, Tailwind CSS

- Architected and launched role-based school ERP and financial-management platforms serving 1,000+ students and 60+ staff, covering attendance, academic records, and transaction tracking with monthly financial flows of approximately 4.5 lakh.
- Built responsive and user-friendly web applications with complex forms, interactive dashboards, and secure authentication flows (RBAC).
- Integrated frontend applications with REST APIs and managed relational database schemas, ensuring clean, reusable, and maintainable code.

FleetOS — Smart Fleet Coordination Platform | [Link](#) | [GitHub](#) | [Report](#) | [PPT](#)

Smart India Hackathon Submission | React, TypeScript, Node.js, Express, Socket.IO

- Built a full-stack fleet-management platform featuring real-time vehicle tracking, automated driver-vehicle allocation, interactive maps, and event-driven communication.
- Integrated frontend applications with REST APIs built on Node.js/Express, utilizing Git and GitHub for team collaboration.
- Designed responsive dashboards and forms with strict input validation, debugging frontend and backend issues before deployment.

Resume Analyzer AI — NLP Web Application | [Link](#) | [GitHub](#)

Node.js, React | ATS Score, Keywords, Suggestions.

- Launched a Node.js NLP application that parses PDF resumes, performs ATS-style keyword analysis, and generates automated feedback reports, supporting 75+ applicants.
- Developed responsive web interfaces and integrated backend APIs to handle file uploads, parsing, and data visualization.

PyRewind — Python Execution Tracing & Debugging Library | [PyPI](#) | [GitHub](#) | [Documentation](#)

Creator & Maintainer | Published on PyPI

- Developed a Python tracing library that records line-level execution state, local variables, timing, trace analysis, filtering, tagging, JSON serialization, and assisted replay, with CLI and plugin architecture.
- Wrote comprehensive test suites to test application features and APIs before deployment, ensuring clean and maintainable code.

EDUCATION

BS in Artificial Intelligence & Data Science — Indian Institute of Technology, Jodhpur <i>Executive Program 2025 – Present CGPA: 7.5</i>	2025 – Present
Diploma in Computer Algorithms & Architecture — Harvard Extension School, USA <i>Harvard Division of Continuing Education Executive Program 2026 – Present</i>	2026 – Present
M.Sc. in Chemistry & Quantum Mechanics — Mahatma Jyotiba Phule Rohilkhand University, Bareilly <i>2023 – 2025 CGPA: 6.8</i>	2023 – 2025
B.Sc. (Hons.) in Physics — Mahatma Jyotiba Phule Rohilkhand University, Bareilly <i>2020 – 2023 CGPA: 7.5</i>	2020 – 2023

TECHNICAL SKILLS

Frontend Development: React.js, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML, CSS

Backend & Databases: Python, Node.js, Express.js, MySQL, PostgreSQL, MongoDB, Supabase

Architecture & APIs: REST APIs, API Integration, Data Structures & Algorithms, Object-Oriented Programming

Tools & DevOps: Git, GitHub, Vercel, Docker

CERTIFICATIONS & PROFESSIONAL TRAINING

Web Development Fundamentals— IBM SkillsBuild | Sep 2025 ([view](#))

AWS Cloud Practitioner Essentials— Amazon Web Services | Nov 2025 ([view](#))

Cybersecurity Essentials— Cisco Networking Academy | Feb 2026 ([view](#))

SCHOLASTIC ACHIEVEMENTS

- Secured Rank 1020 in IITJ-SAT among 1.2 lakh applicants.
- Rank 1, Gold Medal — B.Sc. (Hons.), 3rd year, Govt. Dist. PG College.
